

Unified Communications

We scrutinize all of the nearly 400 Hosted VoIP and UCaaS vendors available in the market today, and bring you only the best.

Today every organization, regardless of size or industry, needs proper communications tools at its core. What if there was a way of bridging your multi-generational workforce, and using tools that are more reliable, flexible, simple, and cost effective? Cloud-based Unified Communications as a Service (UCaaS) can help make this a reality.

- Seamless integration with Microsoft 365/Teams (including Direct Routing) and Google G Suite/Workspace
- Enhanced mobile and remote user experience
- Flexible and scalable to meet your needs
- Improved user and customer experience across multiple communication channels
- Immediate cost savings and optimized billing
- Local, Long Distance, and International calling included
- OPEX with consolidated billing and lower rates
- Simplified implementation, migration, and transition
- Easy, simple, and automatic upgrades
- Numerous, standard third-party integrations, with easy APIs for custom integrations
- IT staff can prioritize on other business needs
- Built-in redundancies for security, business continuity, and disaster recovery
