

JUST BECAUSE YOUR CIRCUIT IS UP DOESN'T MEAN IT'S PERFORMING WELL

Ping

Pings are sent to measure packet loss, latency, and if a circuit is up or down.

Traceroute

Traceroutes are sent through the circuit to provide performance metrics.

Notification

Notifications can be sent via email to alert you if a circuit goes down.

Dashboard

Access web-based dashboards to view circuit status and set up monthly reports.

Gain Visibility and Confidence with Monitored Circuits

There is more than one place to buy bandwidth, but the only place to buy a monitored circuit is through the Cloud 9 Advisers marketplace.

What is Included:

- Circuit Monitoring is available on nearly any circuit with static IP addresses. MPLS and other circuit monitoring also available.
- View resources on a single dashboard for all circuit assets. Customize the dashboard and scheduled reports as needed.
- International circuit diagnostics also available.
- Circuit monitoring includes a ping and a traceroute.
- Measures Packet Loss, Latency, and up/down status.
- Email alerts and other notifications.

24/7 CIRCUIT MONITORING

Many carriers include monitoring; those that do have varying degrees of quality. Our third-party, cross-carrier, neutral monitoring system allows you to have a single, consolidated view and a unified notification strategy across all bandwidth assets. Complimentary monitoring is included with every company and every order placed through our Supplier Portfolio.
